MONITOR AMERICA –Third Edition– "By State"

That's right – You can either buy the complete MONITOR AMERICA book, or simply purchase any individual state chapter "booklet" of your choice!

We're proud of MONITOR AMERICA! No other radio guide has ever had so much information packed into a single volume covering the entire nation. This book is the ultimate travel reference. Whether you're on business or on vacation, just taking a drive, or visiting friends, MONITOR AMERICA is simply the bible of communications.

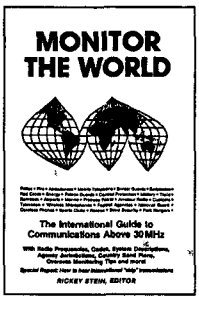
There are folks, however, who only monitor their own local area. They don't travel with a scanner or monitor any bordering states. For these people, we are now making available MONITOR AMERICA "By State." That's right, you can now order just your own state's chapter, a state booklet really, from the new third edition. You will receive all the same incredibly detailed radio frequencies, codes, maps and descriptions for your State Police/Highway Patrol and all other state agencies (DOT, Corrections, Emergency Management, Fish & Game, etc.). You'll also get metro section reports on all the major metropolitan areas of your state, including police, sheriff, fire, EMS, local government, news media, malls, airports, sports, and more. You'll receive the brand-new, county-by-county section, which will cover every community in your state. You'll also receive the AM-FM and station reports, too. The features that you will not receive include the federal and military national frequencies, shortwave, racing, air-traffic-control centers, marine, railroads, telephone, itinerant, and introductory sections. See the preceding page for full details on all MONITOR AMERICA features.

MONITOR AMERICA "By State" is also useful for someone who is visiting a state or two and wants to travel lightly. At over 1,000 pages, the book does have some bulk to it. So, even if you want to own a complete copy of MONITOR AMERICA, but on a trip you want only the chapters for one or more states, then the "By State" service would be just right for you.

Each MONITOR AMERICA state sells for $5.95, except for the largest states which sell for $7.95 each. At 80-pages, the State of California chapter sells for $9.95. The District of Columbia chapter can only be purchased as part of the Maryland or the Virginia chapter. The New Jersey chapter includes both the Philadelphia and New York Metro sections.

When ordering, please be sure to specify which state(s) you'd like on the order form.

Order #MON-xx (fill in state):	**$5.95**	All states (except for CA, FL, IL, MD, MI, MO, NJ, NY, PA, TX, VA)
Order #MON-xx (fill in state):	**$7.95**	FL, IL, MD, MI, MO, NJ, NY, PA, TX, VA
Order #MON-CA:	**$9.95**	CA



MONITOR the WORLD

Read about how radio communications are conducted around the world....Discover the frequencies of law enforcement and military agencies in nations where such data is considered a state secret...Learn how to monitor these channels via "skip"...

Very few nations around the globe maintain an accurate record of the radio users within their borders; and, of those countries which do require users to license their radio equipment, only a handful place these licenses in the public record. Monitor the World, written by Rickey Stein, the long-time international editor of the RCMA Scanning Journal, has spent years compiling the loggings of hundreds of professional and hobbyist radio listeners who live and travel around the globe, and who have reported on the communications of nearly 60 countries.

The book includes frequencies for police, fire, medical, government, military and business channels. Special frequencies include phones, embassy security, utilities, taxis, rail, airports, federal police, amateur radio, and more. For some nations, only a few frequencies are listed; but, for others, such as England, Germany, Mexico and Australia, hundreds, if not thousands, of detailed listings appear.

Countries included:
American Samoa, Argentina, Australia, Austria, Bahamas, Barbados, Belgium, Belize, Bermuda, Brazil, British Virgin Islands, China, Colombia, Cuba, Denmark, Dominica, Dominican Republic, Egypt, El Salvador, England (see UK), Fiji, Finland, France, French Polynesia, Germany, Grand Cayman Islands, Grenada, Guadeloupe, Hong Kong British Crown Colony, Hungary, Iceland, Iran, Ireland, Italy, Jamaica, Jordan, Kuwait, Lebanon, Libya, Malta, Martinique, Mexico, Morocco, New Zealand, Norway, Pakistan, Panama, Papua-New Guinea, Philippines, Russia/Ukraine, Saint Lucia, Saint Maarten (Dutch side), Saudi Arabia, South Africa, Suriname, Sweden, Trinidad, Turkey, Turks and Caicos, and the United Kingdom.
